

EZ-Out Solar Charger Quick Start Guide

What's in the Pack...

Carry/Storage Bag

EZ-Out Collapsible Frame

EZ-Out Tent Pole

EZ-Out Solar Panel

EZ-Out Frame Stakes

EZ-Out Packing Tube

8 ft SAE Extension Cable

How to set up the EZ-Out Frame

Remove all contents from the bag

Open the frame by moving the center struts toward each other

Stake the two front legs

Stake the two back struts

Stake the center strap forward

Step 1 & 2: First, remove all the contents from the EZ-Out Solar System bag. Expand collapsible frame by moving the center struts toward each other until you hear the snap buttons click into the side's holes.

Step 3: Using a hammer, secure frame to ground with the 5 ground stakes provided. Center strap is staked forward to provide panel support.

How to set up the Rollable Panel

Hook solar panel Velcro to frame

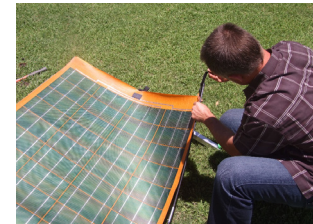

Unroll solar panel and hook to Velcro on other side of the frame

Step 4: Hook panel's exposed Velcro flap to frame. Unroll solar panel and secure other side Velcro flap over opposite frame corner.

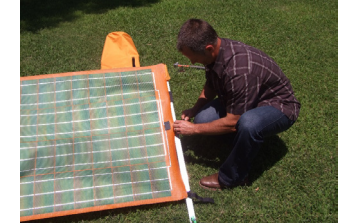

Insert tent pole into the pocket on one end of the solar panel

Step 5: Connect collapsed poles to form one piece. Insert one end of the tent pole into the pocket on one of the bottom ends of the solar panel. Insert the other end of the tent pole into the pocket on the opposite side of the bottom end of the solar panel. Maneuver the tent pole so it slides behind the solar panel securing the lower half.

Insert tent pole into the pocket on the other end of the solar panel

Insert tent pole into the pocket on the other end of the solar panel

Step 6: There are four cinch straps located on the solar panel, two on each side. One side, loop the cinch straps behind frame struts and wrap around ring. Pull panel to frame edge and secure Velcro cinch. Perform the same on the other side and frame leg.

EZ-Out Solar Charger Quick Start Guide

How to Connect the SAE 8 ft. Extension Cable

SAE cable connected to solar panel and load

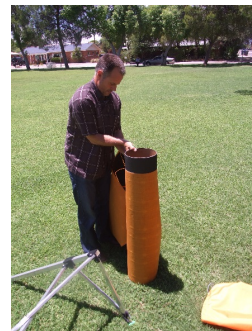

- Connect one end of the SAE 8' extension cable to the solar panel junction box which is located on one end underneath the panel. Connect the other end of the SAE 8' extension cable to the battery adapter or load.

How to Disassemble the EZ-Out Solar System

- Unplug SAE power cord from the solar panel and load and store in bag pocket.
- Remove panel cinch straps from both sides of the EZ-Out frame.
- Reach under solar panel and remove the poles and collapse and store in bag.
- Remove Velcro flap from one corner and roll panel, see above.

Wrap solar panel around the packaging tube

Slide solar panel and tube in bag

Store stakes in bag pocket

Collapse frame

- Depress button snaps at sides of frame and collapse frame by pulling center struts apart.

Slide collapsed frame into tube and bag pull cinch cord and secure lock
